International Trade Fair
for Transport Technology
23.-26.09.2014

Facts & figures (reference year 2012)

Total area (sqm)	161,420
Net area halls / outdoor area (sqm)	94,785
incl. rails (m)	2,917
Total no. of exhibitors	2,515
No. of foreign exhibitors	1,426
No. of countries represented	49
Total no. of visitors	126,110
No. of trade visitors (incl. Convention)	121,066
No. of countries represented	140
Participation fees, 2014:	
Indoor space/row stand (EUR / sqm)	240,-
Track (EUR/m) / outdoor area (EUR/sqm)	178,-
Frequency	every two years
Date of next event	23-26 September 2014
Open to general public / outdoor area	27-28 September 2014

Brief description

With a large number of reference projects and over 220 transport technology firms, Berlin is the main focus of Germany's transport engineering industry and an ideal venue for InnoTrans, an international platform for buyers and sellers of passenger and freight transport technology. InnoTrans has become established as an international industry showplace focusing on Railway Technology. A full range of rail vehicles are presented on the Messe Berlin tracks located outside the exhibition halls. Other key InnoTrans segments include Railway Infrastructure, Interiors, Public Transport and Tunnel Construction.

The InnoTrans Convention taking place in conjunction with the trade show includes a special Dialog Forum organized by the German Transport Forum, VDV (Association of German Transport Companies), UNIFE (Association of the European Rail Industry) and VDB (German Railway Industry Association).

Initiated and organized by Deutsche Bahn AG, the Rail Leaders' Summit (RLS) offers excellent dialogue opportunities for transport ministries and general managers of international rail transport companies.

The Tunnel Construction segment will be accompanied by International Tunnel Forum featuring a series of discussions with international guest speakers and supported by STUVA (German Research Association for Underground Transportation Facilities).

The Public Transport Forum organized by Planungsbüro für Verkehr (PBV) and ETC Consultants focuses on current and future developments in public transport systems.

With the Public Transport & Interiors Hall Forum (PTI Hall Forum) two segments received their own program area where the Speakers' Corner, the International Design Forum and the DB Suppliers' Forum takes place. At the DB Suppliers' Forum the Deutsche Bahn goes into direct conversation with their suppliers.

The InnoTrans Majlis (signifies a customary gathering in the Middle East where important topics are discussed and personal meetings taken place) offers the opportunity to exchange views for numerous senior industry executives and policy makers with high-ranking members of the rail industry and rail transport ministries of the Gulf Arab states.

Products on display

Railway Technology > Rail vehicles for passenger and freight transport / subassemblies and components (drives, transmissions, couplers, brakes, etc.) / vehicle maintenance; **Interiors** > vehicle equipment; **Railway Infrastructure** > Infrastructure / route technology; **Public Transport** > Local and regional buses / stationary systems / passenger information systems / fare management / information technologies / traffic management / communications / data processing / freight traffic logistics / consulting, financing, passenger and freight transport firms, associations, science and research; **Tunnel Construction** > Construction machinery, parts and accessories / communications and safety technologies / ventilation systems / power and lighting systems / interior construction / repair & maintenance / construction products and materials / services / consulting

Visitor target groups

International representatives from the following fields: public and private transport companies and operators; manufacturers and suppliers of transport technology; construction companies; engineering, geology and mining; consulting, public administration and government; trade associations and institutions; science, research & development; media
